19 Aug 1975

MEMORANDUM FOR: Members, OC ADP Committee

SUBJECT   :   ADP Terminal Configuration, [   ]   STAT
                     Building

    1. The move of all of OC except [   ] to the [   ]   STAT
Building will result in collocation of components using six   STAT
ADP terminals. In preparation for the move, we should
determine the most advantageous and efficient placement of
these terminals. Among other items we should consider the
advantages and drawbacks to cluster or "mini-DAC" consoli-
dation. Also, is there a justification for establishing
an ADP operator position or positions to run production of
reports, maintain data bases, etc.

    2. Let's get together in the OC conference room on
26 August at 10:00 a.m. to discuss this item. I'll try to
have a space layout in at least rough form showing where
components will be located.
